## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-85, 87, 88-125, 127-129, 131-133, 135, 137, 138, and 142, drawn to a carpet article with a rebond foam backing, classified in class 428, subclass 95.
  - II. Claim 86, drawn to a method of making said carpet article, classified in class 156, subclass 60+.
  - III. Claim 126, drawn to a carpet article with a slit, peeled foam backing, classified in class 428, subclass 95.
  - IV. Claim 130, drawn to a carpet article with a flame laminated foam backing, classified in class 428, subclass 95.
  - V. Claims 134 and 136, drawn to a carpet article with a specified backing weight classified in class 428, subclass 95.
  - VI. Claims 139 and 140, drawn to a carpet article with a specified recycled foam content, classified in class 428, subclass 95.
  - VII. Claim 141, drawn to a method of recycling waste foam, classified in class 264, subclass 37.1+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and Group I are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as

Art Unit: 1771

claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made by forming the rebond layer as a single layer which is bonded to the primary carpet backing and then adhering a nonwoven layer to the opposite side of said rebond layer, rather than forming a nonwoven sandwich of the rebond foam of double thickness, slitting said sandwich laterally, and bonding one half of said sandwich to a primary carpet backing.

3. Inventions of Group I, Group III, Group IV, Group V, and Group VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the carpets of said groups all have different backing materials and/or features.

4. Inventions of Group VII and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process can be employed to make a carpet underlay rather than the product of Group I. Alternatively, the product of Group I can be made by a process wherein the rebond foam particles are not compressed.

5. Inventions of Group II and Groups III, IV, V, and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP §

Art Unit: 1771

808.01). In the instant case, the method of Group II does not produce the products of Groups III, IV, V, and VI.

6. Inventions of Group II and Group VII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the method of Group II and the method of Group VII have different functions (i.e., method of making a carpet and a method of recycling foam.

7. Inventions of Group VII and Groups III, IV, V, and VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the method of Group VII does not produce the products of Groups III, IV, V, and VI.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

9. Because these inventions are distinct for the reasons given above and the search required for Groups II-VII is not required for Group I, restriction for examination purposes as indicated is proper.

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1771

11. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
